

Approved For Release 2002/08/28 : CIA-RDP71B00185A000100040186-4
UNITED STATES GOVERNMENT

Memorandum

TO : DAD/IO
cc : AD/OEL, C/GSD
FROM : DAD/S&D

DATE: 7 June 1965

SUBJECT:

On 19 May you sent me a copy of a translation of a paper
Effect of the State of Aggregation of Dyes on the Photo-Current
Carrier Sign by A. N. Terenin, et al USSR.

We considered that the technique might have possible
application in clandestine elint equipment since the paper indicated
a frequency sensitivity in these dyes and chemicals. From a
detailed reading of the paper, however, it appears that the sensitivity
is restricted to optical frequencies and it is not apparent that extrapolation
to radio frequencies is feasible.

I am sending it on over to ORD for any possible interest that
they might have.
